Value without compromise

Incorporating common features, such as adjustable 19-inch mounting angles and jacking feet, the Network Rack range offers a configurable top panel system that provides an open base design to promote trouble free installation. Designed to offer the flexibility to meet everyday requirements, the cabinet can be fitted with a range of options including: side panels, plain steel doors, glazed doors, and vented steel doors. With excellent style and aesthetics, the Network Rack is built to the high quality standards our customers have grown to expect.
