To Whom it may concern,

**REF: B-LINE SERIES Wall Box Range**

At Eaton we continually strive to provide our customers with appropriate solutions to suit the evolving needs of the markets we all serve. Consequently we are pleased to announce the following product line changes which reflect the demands of the market.

NR Series Wallbox – Following on from the successful launch of the NR Series Rack system we are pleased to announce to recent launch of the NR Wallbox platform. Designed for today's typical front-office environment, the 600mm width range spans popular unit heights from 6U - 15U (450mm depth) and 6U - 21U (600mm depth). The NR Wallbox has been designed with ease of equipment installation in mind. The side panels and door are easily detached to aid access both during and after installation. Top and bottom cable gland entry enables cabling to enter neatly and efficiently.

**Main Features**

- Robust welded construction is fully assembled to enable quick & easy on-site installation
- 4 standard 19" adjustable rails to suit standard rack-mounted equipment
- Removable side panels and door allow for easy access to equipment and cabling during & after installation
- Easy installation to a wall structure using the removable rear mounting panel
- Vented top and bottom allow for equipment convection ventilation or installation of fan units in top (order code NRWBFFK)
- Glazed door with lock as standard. The door can be hinged left or right
- Cable gland entry on top and bottom
- Side panels may be retro-fitted with a 50mm lock (order code NRWBLOCK)
- Black powder coat finish as standard (light grey an option)

ARS Series Wallbox – Following the launch of the NR Wallbox platform we have taken the decision to retire the ARS Series Wallbox platform (formerly the Access Wallbox range). After many years of loyal service this product line will be withdrawn from sale effective the 1st September 2015.

For those customers wishing to take advantage of some very special offers we have a range of ARS Wallbox models available from stock. Please contact our customer services team on +44 (0)1278 772600 to find out more.

Please note that this does not impact the ARS Series floor standing rack platform which we will continue to market and support for the foreseeable future.

In addition to the product changes you will also see some other changes filtering through. Following Eaton's acquisition of Cooper at the end of 2012 we are beginning the transition from the Cooper B-Line brand to the Eaton brand. Some of these changes have already been implemented, including the launch of our updated web site at [www.blinebyeaton.co.uk](http://www.blinebyeaton.co.uk) and more recently some of the branding on our customer facing correspondence. Further branding updates will follow including the transition of the branding on our product platforms to feature the Eaton brand.

Lastly thank you for your continued support and we look forward to working closely with you.

Yours sincerely,

Rupert Jarman  
Associate Product Manager
